(72)Inventor : SUZUKI OKIFUMI

(54) IMAGE FORMING DEVICE MANAGING SYSTEM**(57)Abstract:**

PROBLEM TO BE SOLVED: To economically and speedily satisfy the request of a customer (user), without having to increase the number of operators on the side of a center system.

SOLUTION: Each image forming device of copy machine 12, 22, etc., transmits use requesting data to the reception center subsystem of a center system 1 via a pertinent private I/F line (16 or 24), a communication adapter (11 or 21) and a public communication network 4, when a user requesting key on each operation display part is depressed. When user requesting data is sent from one of the respective image forming devices, reception terminal device 2,... at the reception center subsystems receives it to automatically sort and transfer to a terminal device for each staff member.

**LEGAL STATUS**

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
